

# JAVA SOLUTIONS COLLATERAL

## Introduction:

It has been our endeavor to provide tailor-made and quality services to our customers. InfoSage has excellent domain competencies in verticals such as Retail, Health Care & Life Science, Banking & Financial and Manufacturing etc. As a diverse end-to-end IT solutions provider, InfoSage offers a range of expertise aimed at helping customers re-engineer and re-invent their businesses to compete successfully in an ever-changing marketplace.

InfoSage has built reputation with proven track record for offering the widest range of services in the application development to services industry. We have extensive experience in developing java applications (both product based and project based) using technologies like J2EE, J2ME, JSP, Struts, Websphere and web logic. We have experience with various bug operating systems such as MS Windows, Unix and Linux.

In today's trend of a distinctive bend towards Web services in all applications, Java platform is integrating key technologies that provide for such high end computing needs. These technologies ensure that deployment is seamless, be it on the networked systems, the web or mobile devices. With this evolution there has been a need to learn and adapt newer development models and frameworks.

InfoSage has partnered with clients to help them realize their goals through solutions built around emerging Java Technologies where InfoSage has provided collaboration of offshore with onsite services, bringing tremendous cost, speed and distributed talent advantages ultimately resulting in a better ROI and cost of ownership.

InfoSage has rooted with basic Java fundamentals and strongly empowered with complete J2EE based solutions. We have successfully architected, modelled and delivered large Enterprise J2EE based solutions.

## Web Services:

InfoSage strongly believes that Web services will be the new wings for Enterprise Application Integration (EAI) solutions. With this, InfoSage has invested its time and money in terms building Web services competence. This is achieved through building multiple Proof of Concepts (POC) and in house applications.

Being a strong service provider in the EAI technology, InfoSage has acquired skills in Web services Integration platforms.

## Product Engineering and Legacy Migration:

InfoSage Java Team has successfully architecture and delivered several enterprise level products in Retail and Health care domain. Our well thought Migration process has been applied to migrate several Enterprise Level Legacy applications to J2EE platform.

InfoSage has spent time in building its own development tools like process Engine & Server Plugging. Usage of these tools and libraries will considerably reduce development time of customer projects.

## Development Tools:

InfoSage team is well equipped with basic concepts, in depth knowledge of Technology, Tools and Modeling capabilities, and well supported by InfoSage's Project methodology.

Being a strong technology company, we have incorporated cutting-edge technology and the best-of-the-breed tools, to provide customers quality deliverables. We have architected and deployed Scalable, robust solutions using IBM WebSphere and BEA Weblogic. We have also deployed Solutions using Open source technologies like Tomcat. To architect the solutions, we have adopted end-to-end J2EE technologies like JSP, Servlets, EJB, JDBC and JMS.

Keeping up with the continuous evolution of Java not only as a language but as a platform, InfoSage has built a strong core of Java experts who excel in emerging Java technologies establishing leadership in processes, execution and deployment.

*InfoSage will bring in the best partnership values to help Customers by providing best-in-class services. Our strong process focus and consulting expertise will enable customers to achieve exceptional quality and on time delivery. As our relationship matures, InfoSage process focus will help you to optimize the development and support functions. We seek to be your long-term partners and will make sure that working with us will be a joyful experience for you anywhere in the world.*
